I. The Greatest Conspiracy of the Dark Ones of All Times

Why Human "[Fake Science](#)" Is a Deliberate Total Deception

First published on February 10, 2019

www.stankovuniversallaw.com

That modern human science is utterly **fake**, especially physics which is considered to be the pinnacle of natural sciences as it describes the physical world with mathematical equations known as "natural laws" and evokes the false impression of being "exact", has been proven by the author beyond any doubt in the most comprehensive way possible. This will be the topic of the present disquisition - precisely, I will not deal with the fact that science is fake as this is undeniable as I have shown in my books and articles listed below, but **why** it is fake, which I have not discussed so far.

BASIC SCIENTIFIC BOOKS: TETRALOGY OF SCIENCE

- [Vol I: Das Universalgesetz in Physik und Mathematik](#)
- [Vol II: The Universal Law in Physics and Cosmology \(Full version\)](#)
- [Vol II: The Universal Law in Physics and Cosmology \(Concise version\)](#)
- [Vol II: The Universal Law in Physics and Cosmology \(Full version, Bulgarian\)](#)
- [Vol III: The General Theory of Biological Regulation in Bio-Science and Medicine](#)
- [Volume IV: Das Universalgesetz im Spiegelbild der Philosophie](#)

and other

SCIENTIFIC PUBLICATIONS

- [The Universal Law of Nature](#)
- [La Legge Universale della Natura](#)
- [Das Universalgesetz der Natur](#)

- [The New Axiomatics of the Universal Law](#)
- [Nowa Zintegrowana Fizyczna i Matematyczna Aksjomatyka Prawa Uniwersalnego](#)
- [The Greatest Blunder of Science. Charge is a Synonym for Area](#)
- [An Easy Propaedeutics Into the New Physical and Mathematical Science of the Universal Law – ebook](#)
- [Gnosis as a Personal Experience](#)
- [La Gnosi come un'esperienza personale – ebook, pdf](#)

Science, and all the scientists, have not only got the Nature of All-That-Is totally wrong, they have done that by design of which they are not aware of. Basically, science is a thoroughly agnostic, blind categorical system that completely disregards **Human Gnosis** - the only true fundamental idea that all knowledge is available to our souls and we only need to find a full access to it [by identifying with our soul and the I AM Presence, i.e. by way of re-membrance](#). This is what will happen after our ascension and even before that in preparation for this event.

Ultimately, current science, and by default philosophy and all religions, do not understand the nature of the **Primary Term** of human consciousness, from which all human ideas and concepts are derived **axiomatically** in a secondary manner, as I explain extensively in all my scientific and philosophical books on **Modern Human Gnosis**:

- [Neue Gnosis: Evolutionssprung der Menschheit](#)
- [New Gnosis: The Evolutionary Leap of Mankind](#)
- [La Nuova Gnosi: Il Salto Evolutivo dell 'umanita'](#)
- [Gnostische Tradition der abendländischen Philosophie](#)
- [Neoplatonismus und Christentum](#)
- [Philosophische Quellen: Descartes, Spinoza, Leibniz, Kant](#)
- [Gedanken](#)
- [The Cosmic Laws of Creation and Destruction – Why and How the World Economic Order Will Collapse in 2011](#)
- [Le leggi cosmiche della Creazione e della Distruzione: Perché e Come l'Ordine Economico Mondiale crollerà nel 2011](#)
- [Die kosmischen Gesetze der Schöpfung und Zerstörung: Warum und wie die Weltwirtschaftsordnung 2011 zusammenbricht](#)
- [The Cosmic Laws of Creation and Destruction \(Croatian\)](#)
- [The Cosmic Laws of Creation and Destruction \(Macedonian\)](#)
- [Ten Reasons Why the New Age Movement Has Declared Intellectual and Moral Bankruptcy](#)
- [Dieci ragioni per le quali il movimento New Age ha dichiarato fallimento intellettuale e morale – Articolo completo](#)

- [Zehn Gründe, warum die New Age Bewegung den intellektuellen und moralischen Bankrott erklärt hat – Vollständiger Artikel](#)
- [Gnosis as a Personal Experience](#)
- [La Gnosi come un'esperienza personale – ebook, pdf](#)

In addition, this website contains more than 3000 publications which all contribute to various aspects of this most extensive and profound intellectual **Proof of Truth = Proof of God** ever accomplished in the history of mankind. This is very important to observe at this place as to eliminate any misunderstanding or disparagement of the author from the very beginning, or blunt idolatry of himself by the masses in the aftermath of his ascension. This will be counter-productive to the ascension aspirations of all my future readers, who will soon be in the billions.

As I can foresee it, very soon all humans will want to ascend when they see what we can achieve as ascended masters. However, as humans are currently highly conditioned to immediate gratification, which will no longer work on the new earth, this will be another blunder they may not avoid that will be as illusory as their current fake science (read also [here](#)).

As first comes an idea, a mental concept carried on the creative wings of our powerful emotions, because all incarnated human beings have a direct light cord to the Source (humans are God's sparks) and are thus powerful creator beings, the holographic reality we create on the earth and perceive as Nature, physical and organic, and as Cosmos is entirely the creation of our collective thoughts. Nature and the external world do not exist as separate, distinct entities outside our inner mental and emotional fields. In other words, everything we perceive with our senses and define as 3D reality is our own inner creation. For ever!

As we, human beings, are also Creation of God's idea, as his image, which we can also define as "Spirit" as was usual in Antiquity (*Platonism* and *Neoplatonism*), everything we perceive with our senses and process with our minds and emotions is the **Manifestation of Spirit in its Pluripotence**. Modern science has not grasped this fact from the very beginning as it has evolved entirely as an empirical discipline of agnostic, positivistic thinking and considers Nature and All-That-Is to be "dead matter", as I explain in depth in my philosophical books on Human Gnosis (see above). The greatest failure of science is to reject the existence of Spirit in all manifestations of All-That-Is - physical matter, humans, animals, plants, Gaia as a conscious being, the multiverse (perceived as cosmos) are Creation of God's Divine Mind and are thus living conscious energy.

In other words, present-day science is fake precisely because it has rejected the basic transcendental truth of all Life:

This holographic 3D reality, in which we as humans live, is the Creation of our thoughts and Ideas as Souls.

Essentially, current fake science rejects humans as powerful Creator beings, and in the following I will explain why this has happened by design - by the most insidious design in the entire multiverse. Thus I will verify why all scientists are totally blind, blocked, and incapable of grasping the novel holistic, transcendental approach of the new theory of the Universal Law, i.e., why they have zero natural intelligence. As this is the new **Science of Ascension**, "*it will be easier for a camel to go through the eye of a needle than for a scientist to enter the kingdom of God*", if I may quote at this place my predecessor [Apollonius of Tyana](#), alias Jesus.

In other words, all scientists must totally reject their current science which is only a means of survival in a hostile, insecure and unpredictable world that allows them to live as a kind of privileged caste in countless research institutes, financed by the taxpayers and yielding nothing of value, as once the priests of religions did and many still do. Scientists and priests are classical human drones (a drone is a male bee in a colony of social bees, which does no work but can fertilize a queen or engage in pedophilia as is the case with the Catholic clergy). That is why not only fake science, but also all religions will be very soon fully abolished by the new theory of the UL and will disappear from the new earth once and for all. But as the topic of my discussion here is Science, I will deal with religions one more time at a later date.

The fact that Science and all scientists have not grasped the essence of Nature as **conscious intelligent energy** and us, humans, being part of it as powerful creators of same, simultaneously and multidimensionally on numerous levels in the Now (linear time is another human illusion), is the most wondrous and troublesome phenomenon one can observe on this planet, and even in the entire infinite multiverse. The scope of human intellectual deception in science is very difficult, almost impossible to comprehend when one has grasped the new Theory of the Universal Law (UL) to the full extent and is aware how simple and beautiful the true Nature of the Universal Law is.

When I first discovered the UL in 1994 and then developed the new physical and mathematical theory in the following two years, I was stunned by the depth and extension of scientific fraud in physics and later on in bio-

science and medicine. It seemed incomprehensible to me how it was possible that so many millions of scientists throughout numerous generations, since modern science emerged about 4 centuries ago with Galilei and Descartes, could not see all the obvious and stark blunders in physics, mathematics and bio-sciences and continued to worship this false deity with an indoctrinated rigid fervour.

For the sake of objectivity, I must add at this place that mathematics was found to be in a [foundation crisis](#) since 1937, actually much earlier, after *Goedel* proved with his famous theorem that mathematics cannot prove its validity with its own means. As mathematics is a hermeneutic discipline without any external object of study, it can prove its validity only by means of mathematical logic. And Goedel proved precisely that - that mathematics cannot prove its own validity with its own means. Each time the principles of *mathematical formalism*, as advocated by Hilbert since 1900, were applied to the axiomatization of this discipline, it led to two contrary and mutually exclusive conclusions, both of which seemed to be true. This is called a profound paradox or *antinomy* and is the strongest proof that mathematics as a science must be fake.

Since the foundation crisis of mathematics could not be resolved by anybody after Goedel's proof, this problem was deliberately swept with a huge broom under the carpet of forgetfulness by all helpless mathematicians and scientists who are incompetent and insincere seekers of the truth. Nowadays, nobody in scientific circles is even remotely aware that there is such a thing as foundation crisis of mathematics and I, myself, have done a lot of surveys on this topic among academic circles.

By the way, **I abolished the foundation crisis of mathematics as an artifact in 1995**, after I discovered the Universal Law and developed the [New Integrated Physical and Mathematical Axiomatics](#).

Therefore, when we are talking about scientists here, we must be aware that we are dealing with the most recalcitrant representatives of humanity, which is also at a very low level of spiritual and intellectual evolution. Human ignorance and stupidity are very widely distributed among the entire world population and they have, for the most part, been the product of deliberate mind-control and manipulation by evil forces from the astral plane. Nowhere has, however, the mind-control been so all-pervading and destructive as among the human sub-population of present-day scientists.

As original human nature is that of natural curiosity, the current mental state of total blockage for the Truth, which all scientists currently display, must have been the result of a very prolonged and massive mind-control of

the dark ones from the astral plane. By that I mean the Powers That Were (PTW), the ETs from the Orion / Reptilian Empire, such as reptilians as shape shifters, the Greys, zeta reticuli and some minor groups of negative dark entities and the combined evil forces from the astral plane, such as archons, Luciferian and Ahriman forces; the latter provided the master-minds that developed the far-reaching plan of total enslavement of humanity in the current End Time as to prevent the ascension of Gaia and part of humanity. I have discussed this topic numerous times in my articles and I will delve into it one more time below when I discuss the total manipulation of the scientists' minds since time immemorial and why this was done on purpose.

The present-day form of fierce dogmatic indoctrination manifested as blind, agnostic, narrow materialistic, rejective mind, which all scientists without exception currently display, as I have proved beyond any doubt on numerous occasions, surpasses even the greatest religious extremism as professed by the worst individuals and institutions on this planet, beginning with the Vatican's Inquisition and crusades against true Christians that commenced with the extermination of the [Cathars](#) in Europe, Southern France and then expanded to the Middle East, of which the current derailed islamic terrorists are the natural karmic relapse. Many thinkers and scientists who questioned the Church doctrine, e.g. the false Ptolemaic (geocentric) system, were burnt at the stake and are still condemned by the Inquisition to the present day. [Savonarolas](#) and [Ratzingers](#) wherever one looks around.

There is only one true way to study the history of mankind and that is the study of the ideas that have shaped this civilisation. And as proven by the author again and again on this website, all the foundational ideas of humanity that determine this reality and the way of life in the 3D matrix are utterly false and have only deepened the level of human illusion, ignorance and separation from the Source. Nowhere is this more true than in present-day science that is considered to be the only categorical system of Truth about physical (physics, chemistry, geology, cosmology, etc.) and human nature (bio-science, medicine, pharmacology, etc.) which men have developed so far, although the masses do not understand it and, honestly, do not care about Truth and real Science at all.

In this sense, any study of the history of mankind is a painstaking analysis of all the mental blunders the collective and individual human mind has introduced in science, religion, politics, and economics, that is, in the realms of human spirit. It is a never-ending Odyssey and a very depressing

and unrewarding one. I know what I am talking about as this is what I have done all the time throughout this very intense and difficult incarnation.

Let us be frank, how many individuals are there on this planet who have dedicated themselves to the noble intellectual goal of seeking the ultimate Truth - the first (and last) things in human life - and have embraced human [eschatology](#)? I know only a few and I am happy and proud of being in contact with them or having them as friends. None of them is a scientist-theoretician, as this is understood today, although [they cherish the deep and powerful quest of their souls to become experts of True Science since their birth](#), which is their greatest spiritual advantage over conventional scientists.

Just as one cannot have an ecclesiastical career unless one drops his faith in the eternal existence of the soul and its reincarnation at the entrance of the seminary, as I have written with respect to the [young soul of papa Ratzinger in my lucid essay](#), one cannot understand the new holistic, transcendental world view of the new theory of the UL, unless one fully discards present-day science and all the indoctrination students are exposed to during their scientific education.

This is an act of highest courage and, as we know in the meantime, all scientists are the worst cowards. By this I mean the only form of true courage a human being can display - the indomitable pursuit of true knowledge, no matter what - and not the petty derailed acts of killing oneself in the name of fake ideals and ideas as is the case with all soldiers of the national state or religious fanatics and suicides as we observe in the numerous wars and conflicts on this planet.

Science is Life and cannot be separated from daily life. This will become obvious after the shift and our ascension will take place. Currently, the overwhelming majority of the people live their daily lives without science, many hate science as they were very poor in science at school and at the university. In the rare cases when some individuals deal with science outside a scientific career, their knowledge of science is so appallingly distorted and inept, and their false scientific ideas are so outright scandalous, that they should be put in an educational asylum to study the UL and will be allowed to leave it, only after they have proved that they will no longer misuse the Truth in the name of fake science as this is such a popular practice among all New Agers nowadays. They do that only to appease their egos and pretend to be wise, being somebody who has something to tell the world. I am very serious about this issue, just as I am disgusted about this pseudo-spiritual behaviour.

These people believe that they can say and write any stupidity in the name of science as the energies that they are talking about cannot be measured or assessed by scientists and their material instruments. That much they know, so that the invalidity of their imbecile scientific ideas can never be properly exposed. All human impostors have a unique devious character and know how to project their false personality onto the collective stage without being immediately exposed for their fraudulent nature. Nowhere is this negative trend so pronounced as among the small community of light proles (workers), and to my surprise and utter disgust, the women are the leading scammers. So much about feminine energies.

This disingenuous approach of the tiny faction of enlightened people on this planet towards science is the dialectical mirror image to the total disinterest of scientists to discover the ultimate Truth of All-That-Is, but otherwise both groups are very much alike in their insincerity and inherent spiritual amorality often peaking to distasteful intellectual promiscuity that is fed by lavish plagiarism. In this sense, the New Age light proles, who are considered to be the spiritual spearhead of awakening humanity share the same intellectual and moral vices as the scientists and will have to transform first into camels if they want to ascend to heaven, that much is sure.

The bitter and unvarnished Truth is that all humanity has been under massive mind-control with respect to science, some more, some less, since eons of time. The more an individual deals with science, the more he was subjected to mind-control by the PTW from the former Orion / Reptilian Empire who are responsible for this scientific fraud. These dark negative ETs were eliminated once and for all from this ascending Gaia by the PAT with great sacrifice and personal courage as the history of the Planetary Ascension Team reveals in a seamless chronicle:

[The Journey of the Planetary Ascension Team](#)

Let me now elaborate on this issue based on the latest information we are getting from the HR these days. This is only a preliminary information that will help us in the imminent introduction of the UL and we expect much more to come in the near future. Our minds are now expanding exponentially in our ongoing ascension and assuming our mission as Logos Gods of new Earth. This includes an intimate knowledge as to how the minds of all scientific oriented people were dumbed down in the most intense and insidious mind-control ever witnessed in this multiverse and in total breach with the Universal Law and the spiritual principles of the Source and All-That-Is. We need to have this knowledge as to design our strategy how to

introduce the new theory of the UL in the most efficient way according to the [Law of Energy Optimisation](#).

Before continuing with my discussion, let me make a profound statement that is indispensable at this point in time: no human being will qualify for ascension unless he/she has reached the highest level of sincerity, inner transparency, integrity, and the utmost form of self-critic. Judged by these spiritual standards, I do not see any of the light workers that are currently lavishly living out their egomaniac spiritual high-esteem on the Internet New Age stage to ascend anytime soon. This is a basic and most common human angst, which they have to overcome first before they can qualify for ascension. As this same basic angst, disguised as scientific, intellectual high-esteem, is also very common among scientists that prevents them from grasping the revolutionary character of the UL, this conclusion also applies to them.

And here is what we are getting from the Source concerning mind-control that has been exerted on all humans with respect to science and why this has been done in this extreme form as to render such a fake science with respect to ultimate Truth.

Eons of time ago, surely more than 200, 000 years ago earthly time, a group of very dark and insidious ETs from this universe have begun to mind-control humanity. These entities had severed their light cord to the Source long time ago and knew that they are doomed to die as incarnated 4D civilisations. The reptilians, the Greys and zeta reticuli from the PTW belong to this group, but there are more dark, evil ET species in this universe, of which we humans know nothing, although they have had a huge impact on the evolution of the human race.

These dark entities decided to totally dumb down all humanoid civilisations who are in a 3D/4D incarnation cycle throughout this universe, and not only humanity, and to totally sever them from the Source. The reason for that is that humans are God's sparks and have an intact light cord to God and the [Divine Mind](#). Thus they have the propensity to ascend when they, rather their souls, decide so.

Ascension was planned for the earth since its inception as an incarnation experiment in the highest possible density, as this small planet was created as a melting pot for all souls from numerous incarnation experiments throughout the multiverse who did not manage to ascend on their original planets in a more normal and gradual way and incarnated on the earth. This planet is considered to be the most toxic and difficult place to incarnate as it contains the most derailed and negatively tainted soul fragments in the

entire multiverse who have created for themselves the greatest possible density and separation from the Source, deliberately of course, as to test the limits of their souls as powerful creator beings from the higher realms.

In order to compensate for this collective darkness, the most evolved, bright and courageous souls of this multiverse decided to also incarnate on the earth to keep the light quotient and counterbalance the darkness of all the failed incarnated human soul fragments. As these **star seeds** are all very powerful creator beings and have huge energy fields, only a tiny fraction of them was needed to keep the balance of light on this planet. At the same time this high level of existential severity allowed for a rapid evolution of all the incarnated human personalities as it activates their light cords and thus triggers the LBP and the ascension process from within. Before a planet can ascend, some very daring individuals have to ascend first and pave the way for the planetary and collective human ascension. This is essentially the [role of the PAT](#).

For this reason, it was decided that Gaia and humanity will ascend within one lifetime, within one human incarnation - and this has never happened before in this multiverse. This is the **greatest experiment of all times** and that is why the level of mind-control and dumbing down of the human population had to be also unique and the most extreme in the entire multiverse. The speed of current ascension is proportional to the level of challenges and debasement humans encounter on the earth and are ready to overcome within one lifetime. That is why this incarnation is so turbulent and exhausting for all humans, regardless if they know it consciously as the few light warriors do or have no clue as is the case with the agnostic masses.

Therefore, the shift that is about to happen very soon, will be the **most dramatic and shocking event a sentient species has ever experienced in an incarnated state**. From the most dumbed down, totally severed from the Source incarnated humanoid civilisation, humanity will skyrocket to a highly evolved multidimensional, transgalactic civilisation within the blink of an eye. This will be the most profound revolution any humanoid civilisation has ever experienced in this multiverse and it will reverberate throughout the entire multiverse and affect numerous other humanoid and other civilisations, from where many of the earth soul fragments come.

As any true revolution is a revolution of consciousness, the human collective mind and its *Weltanschauung* will experience the most radical expansion of awareness - from the deepest level of total agnosticism and separation from the Source, to the total openness and acceptance of this divine connection. It is very easy to perceive that this radical transformation will

be accomplished by the introduction and rapid acceptance of the new theory of the UL which is, in its function, the [Theory of Ascension](#) for the human species.

Needless to say that this transformation will affect in the first place the scientists and also all the representatives of established religions whose failure as gnostic teachings I have discussed in depth in my gnostic books (see above). These human beings will lose all of a sudden their life content temporarily and will feel like stranded Robinson Crusoes on the shores of an uninhabited, remote island, before they can gather their wits and understand the bigger picture.

Now back to the evil ETs who decided to dumb down humanity long time ago, much longer than the history of Lemuria and Atlantis and their subsequent destruction 12,000 - 15,000 years ago. Their main target was the scientific mind of humans who are very curious entities in their pristine form as God's sparks and carry the strong inner impulse to find out **who they truly are**. In order to hijack this inner human tendency to search for the ultimate Truth, these evil ones decided to manipulate in the first place the two major categorical systems of human knowledge that are in search of the ultimate eschatological truth - Science and religion.

In fact, at the very beginning these two systems of knowledge were not separated on earth, but were mere dialectical aspects of one universal system of human knowledge as is the new theory of the UL with its **General Theory of Science** and **Modern Human Gnosis**. This was the case in Lemuria and Atlantis, where the Fall from Grace of these civilisations happened at the pure personal and ethical level and where science still had an access to true knowledge, namely that humans are incarnated soul fragments and much more than their physical bodies. Likewise, the technologies which these two civilisations developed were much more advanced than those nowadays. This however did not prevent their downfall and ultimate catastrophic destruction as they infringed upon the **Law of Oneness** as they called the UL at that time.

But as the overarching plan of the dark archontic masterminds from the astral plane (Luciferian, Ahriman forces) was, after the destruction of Lemuria and Atlantis, the total enslavement and eventual annihilation of the human population that survived these catastrophes in order to prevent their ascension in the current End Time, they decided to accomplish that by introducing **fake religions** and **fake science** of the Divine Mind and Source - of All-That-Is. The reason for that was that all the numerous colonies which Lemuria and Atlantis established on the other continents prior

to destruction, such as in Asia (mainly India and the Middle East), the two Americas (Central and South America), Africa (Egypt) and Europe (ancient Greece and the Mediterranean space) carried forward the spiritual knowledge of these two advanced civilisations and the people at that time were much too intelligent to allow to be dumbed down in such a simple but profound manner as we experience nowadays on the verge of the planetary ascension.

We have in the meantime enough information that individual ascensions have happened, for instance, in Ancient Egypt after the destruction of Atlantis and surely in ancient India where the idea of Buddha is firmly established in the cultural heritage of this country. I know from Bulgarian channeling sources in the 90s that received this information specially to share it with me, that there were some local highly evolved **sensorial civilisations** on the territory of Bulgaria and southern Romania who became the prototype of the Olympic Gods in Greek mythology as they had established a surveillance base on Mount Olymp to control the Mediterranean space as they were at war at that time with another advanced Atlantean colony in Egypt. Today, [there are numerous excavations of giant human skeletons of ETs](#) (2.5 meters and [even taller up to 10 m](#)) who have lived in [Bulgaria](#) and [Romania](#) long time ago, about which archeologists prefer not to talk as this would question and destroy their entire false discipline.

Even if we look at Ancient Greek knowledge that is the oldest scientific knowledge modern western humanity has inherited and knows of, such as the teachings of Aristoteles and Plato, less so of Pythagoras, about whom we know only from later generations of ancient scientists, it is an **integrated system of Human Gnosis** where theological and teleological concepts harmoniously unite with exact science as embodied in Geometry, of which *Euclid geometry* is a late compilation. In fact, Platonism, including Pythagoreanism, and its further development [Neoplatonism](#), together with the categorical systems of human knowledge and science developed by Aristoteles, not only dominated western human history for almost one millennium (from the 6th century B.C, Pythagoras until the 6th century A.C., [late Gnostics](#), when the Christian Byzantine Emperor Justinian closed down Athens' philosophical schools of Neoplatonism in 529, and ushered the Dark Ages of Church dogma), but have actually much influenced science until the present day, even if most agnostic scientists are not aware of this spiritual connection.

These ancient teachings were essentially [Human Gnosis](#) - the acknowledgement that all true knowledge comes from within, from the soul, and that the external world of the senses is an utter illusion. That is why ancient

thinkers did not divide artificially mathematical and geometric knowledge from religious and gnostic knowledge of the Divine as they knew that **all Creation is Pure Mathematics**.

Unfortunately, when these dark ones hijacked Christianity during the [time of the seven ecumenical councils](#) (from 325, the [First Council of Nicaea](#) to the [Second Council of Nicaea](#) in 787) when Christian dogma was firmly established and the [original teachings of Apollonius of Tyana](#), including Ancient Gnosis and Philosophy, were fully distorted and suppressed (including arson of major ancient libraries such as the famous Alexandrian library), western civilisation entered the Dark Ages. During this time the unified scientific knowledge and the valid categorical systems of Ancient Greece were almost fully forgotten, or rather deliberately suppressed by the dark evil entities from the astral plane, who had only one goal - how to dumb down humanity and destroy it - which they almost achieved for another millennium - until the onset of Renaissance.

Modern Times in the Western world began with Renaissance which was essentially the re-discovery of the basic truth that All-That-Is is intelligent organised energy that shapes the material forms of the sensual external 3D world according to mathematical rules as advocated by Platonism and Neoplatonism. Therefore it is not a coincidence that the first modern [Neoplatonic academy in Florence](#) became the centre of this cultural revival that changed the history of western civilisation for the better. This is a basic knowledge of humanity since Pythagoras and was well known in Atlantis and Lemuria as well as in all their colonies for thousands of years.

All renowned Renaissance architects and artists were excellent geometers (mathematicians), otherwise they would not have performed such incredible architectonic masterpieces and solved numerous challenges of statics, which even present-day architects are incapable of and are in utter awe. This is also the reason why [Florence will very soon become the cultural centre of the new world, while Rome will become the world spiritual centre as announced by the Elohim after we established the new spiritual paradigm in Rome on November 12th, 2018](#)

In my gnostic-philosophical book

[Descartes, Spinoza, Leibniz, Kant](#) - Philosophic Sources as Background to the New Pantheism and Gnosis of the Universal Law

I write about the founder of modern science in late Renaissance *Descartes* as follows (p. 18):

"With the clarity of his thoughts and the rigor of his arguments, *Descartes* becomes the model of all later philosophers. His **mathematical ideal of knowledge** is upheld by *Spinoza*, *Pascal* and *Leibniz* and influences the whole European philosophy of Baroque and Enlightenment. It is just a natural continuation of the enthusiasm of the *Neoplatonic Cusanus* for the "magic of numbers" in exploring the visible world of bodily things and the invisible world of disembodied ideas, *Nous*. Cusanus shares this enthusiasm with G. Bruno, J. Kepler and G. Galilei, the founders of modern physics.

Only the English empiricists, *Locke*, *Berkeley*, and *Hume*, seem to be untouched by the mathematical rigor of continental philosophy, though they look back on some notable role models. So *Bacon* discards the first scholastic method of medieval theology, which is to answer all questions by appealing to authorities such as the Bible, Aristotle, and the Fathers of the Church, replacing them with **logical deduction**. In his main work with the subtitle "On the Benefits of the Sciences" he deals with the foundations of logic, language knowledge and mathematics, with the help of which he wants to advance physics in order to answer his questions about Nature itself."

As you can see, even at the beginning of modern science in late Renaissance and early Baroque, the first modern scientists firmly believed in the unity of all human knowledge under clear mathematical logic. All philosophers at that time, who were the true scientists, adored geometry and used it as a universal method of presentation - for instance, [Spinoza wrote his famous Ethics according to the geometric method.](#)

This scientific mathematical ideal was fully distorted by the evil dark ones who began to extensively mind-control all scientists with the begin of the Industrial revolution in the 19th century, in particularly in England, which is the citadel of these dark ones where the Queen is a reptilian shape-shifter and so are all the major banksters families that control the banks in the city of London and through it the world finances.

With the beginning of modern science, we can observe an exponential increase of the mind-control of the scientists' minds which reached a detestable culmination in the last several decades and in particular after I discovered the UL a quarter of a century ago.

However, this sinister plot was planned by the dark evil ones much earlier and they had an easy game in the 20th century when all modern scientific disciplines were practically developed from the position of rabid agnostic materialism and blind empiricism in a complete separation from each

other: For instance, bio-sciences have nothing in common with physics, chemistry is also more or less separated from physics. Physics, itself, being the crown discipline of exact scientific knowledge has completely severed its natural connection to philosophy and even from the theory and philosophy of mathematics, from which it originally emerged as I have shown in a lucid manner in my [essay on Galilei, the founder of modern physics](#). Modern science has completely severed its connection to Human Gnosis which is now decried as false esotericism and completely disparaged with an astounding arrogance and pseudo-scientific high esteem.

The compartmentalisation of the scientific mind has achieved mind-boggling proportions in the current End Time and has surpassed even the official medical definition of *oligophrenia*. This annihilating observation should be stressed at this place without any make-up as to illustrate what gargantuan educational work lies ahead of us when the shift will come and we appear officially as ascended masters in front of humanity.

Essentially the dumbing-down of humanity by the evil PTW has progressed historically with the begin of Modern Time in a two-pronged way - by falsifying Science and Human Gnosis, beginning with their separation as two distinct and seemingly incompatible categorical systems of human knowledge and then continuing with the compartmentalisation of each scientific discipline until they reach a state of total meaninglessness. The current narrow specialisation in science that produces professional idiots is the natural consequence of this atomisation of true Science into fake science. Thus scientists were hopelessly caught in this inextricable scientific maze and became an easy prey to further individual mind-control.

Take physics, for instance. This discipline is now divided in numerous disciplines, such as *classical mechanics*, *electromagnetism*, *thermodynamics*, *theory of relativity*, *quantum physics*, *QED*, *QCD*, *string theory*, and then finally we have the *standard model* as the pinnacle of scientific obfuscation as I have written in my open letter to scientists, which I sent, with the help of Patrick, to 10,000 physicists in June 2017:

[Open Letter to All Scientists on This Planet – Accept the Universal Law or Vanish](#)

*"Present-day physics is in big troubles as the **standard model** cannot explain most of the phenomena observed. It is unable to integrate gravitation with the other three fundamental forces and there is no theory of gravitation at all. This deficiency is well-known.*

I made a survey on the main focus of research activities of ca. 1000 representative physicists worldwide as they presented themselves on their personal websites and found out that more than 60% of all physicists have dedicated their theoretical activities on improving or substituting the standard model which is still considered, out of inertia and lack of viable alternative solutions, to be the pinnacle of modern physics, incorporating classical quantum mechanics, QED and QCD with the theory of relativity, but not classical mechanics.

This is the most convincing proof that the standard model is “fake science” and that it must be substituted as it does not explain anything. It is very encouraging that the majority of physicists and scientists (theoreticians and mathematicians) understand and accept this stark and shocking fact.”

Is it justified to conclude from this historical survey on human ideas that have shaped the form, scope and content of modern science, all of which have gone rogue in the last 100 years, that the minds of the scientists have reached an unprecedented level of [mental and spiritual devolution](#) by extensive mind-control from the astral plane? Indeed, this was the case until the summer of 2016 when we, Carla and I, with the invisible help of the PAT, single-handedly eliminated all archons and other 4D evil forces in a heroic and epic battle and wrapped up the astral plane around the earth in preparation for its shift to 5D this year. With that the mind-control of the scientists ceased and, if they still behave like zombies, this is the result of the sluggishness of the low vibrations of their mental and emotional bodies that are still thoroughly contaminated by dark patterns of fake thought ideas that were instilled in their agnostic ego-minds by the archons from the astral plane for a very long time.

I know how effective and compelling this thought manipulation can be as I have been attacked (and beamed) numerous times brutally by very dark archons and Luciferian forces from the astral plane or directly by human demons in my surroundings before I could eliminate them with my light saber and special light invocations, so that I am fully aware how easily such attacks can change the mind and the psyche of the victim. Very few light warriors are consciously aware or ready to admit this kind of negative experience, while most light workers deliberately and fearfully reject this dark aspect of human existence and seek a flight in the "love and light" illusion of the New Age.

At the same time the ignorant, agnostic masses have no clue what has been happening on the earth from the astral plane since eons of time until 2016

when we abolished this plane and how massively humanity has been manipulated and dumbed down by various heinous dark forces. Although one only needs to observe how rabidly and insidiously all politicians, mainstream journalists, and celebrities behave nowadays as they are also a main target of such massive mind-control or carry demons in their fields. The latter can only be eliminated by the free will of the victim and most victims are unaware thereof. That is why there are still many possessed humans on this ascending Gaia, although the astral plane of the archons no longer exists, so that one should be very careful and attentive in these last days prior to the shift when these demons can no longer cope with the high frequency waves from the Source and their human carriers begin to run amok. I expect similar behaviour in scientific circles when the UL will be introduced on a global scale.

Finally, it is very important to stress at this place that I consider all scientists victims of the most evil mind-control and have a lot of compassion for them as human beings as I know how much they have suffered at the soul level and will have to suffer before they can overcome this state of total mental confusion and acquire the clarity of the Divine mind. However, I am not sure how many of them will be able to comprehend the UL and its theory in this lifetime and therefore do not consider them important for its popularisation.

I will explain below why, but essentially the impending introduction of new advanced technologies from the 5D cities of light that will radically improve life on earth will happen outside the current established system of scientific research institutes and state entanglement as also [the national state will be abolished very soon](#). In other words, we will not need the scientists to introduce new technologies based on the UL but will be happy to welcome them in the cities of light if they show desire to awaken and evolve spiritually.

Now, let me finally disclose to you why these evil dark ones dumbed down all the scientists on this planet in such a profound and horrific manner that they can now no longer think in a straight logical manner as to understand the epistemological basis of the simplest equation which the human mind can build - **the rule of three** - which happens to be the UL when presented in a mathematical way:

$$\mathbf{E} = \mathbf{E}_A f = nhf = SP(A)[1d-space-time][1d-space] f$$

These dark evil entities manipulated human science into fake science, just as **they created synthetic worlds in August 2013** in order to prevent our ascension after [Carla, and a week later, I, myself, were the first humans to transfigure our carbon-based bodies into crystalline light bodies and visit Shamballa in the Inner Earth Agartha](#) (read also [here](#); actually Shamballa exists in the 7th dimension and has nothing to do with Inner earth topologically. Initially we believed we had visited Telos, but we were corrected much later by our higher sources that it was Shamballa.):

[Message From AA Michael: Carla's Journey on August 28th to the False Synthetic 4D Worlds Created by the Dark Lords to Trap Ascension Candidates has Paved the Way for the Detonation of the PAT and Our Full Ascension.](#)

They have severed their light cord to the Source to such an extent that they have no chance to ascend at all and are therefore doomed to die as biological species. This explains their desperation in 2013 when they tried in vain to create false synthetic worlds to trap the first ascension candidates which were able to ascend to the 5D after the PAT opened the stargate 12.12.12 - 12.21.12. At the same time these evil entities exist in the 4D and thus have a superficial energetic advantage over human soul fragments as long as they are incarnated in physical vessels, which are very limiting to the creation potential of human souls. This has given rise to the wrong expectation, or rather hope of these dark evil ones that they might somehow outsmart Heaven and enter it through the backdoor.

They believed that if they figure out how human body operates and manipulate its genetic make-up and its chakras, that they would be able to use such human bodies and also ascend with us by short-circuiting (avoiding) the law of karma. As they have accumulated such huge karma, while cruelly and pitilessly destroying human lives since eons of time, they need an infinitely long period of incarnations under the law of karma, until they can redeem themselves and qualify for ascension. However, this is exactly what these dark evil ones want to avoid at any price as they are completely possessed by hubris and suffer from the false god-like syndrome.

Since they have manipulated humans for eons of time, they began to believe that they are special and have even forced humans to worship them as gods in some past cultures and civilisations on earth as was the case with the dark ETs, [Anunnaki](#) in Sumeria, Assyria and Babylon.

The Anunnaki also meddled with the genetic code of humans as to create a docile version of humankind that can function as the ideal slave and work

in their gold mines under terrible conditions, but eventually failed. However, there have been numerous genetic experiments on humans in the past by such dark ETs and this negative heritage has additionally dumbed down the minds of humans and that of scientists in particular. Most humans who become scientists come from such genetically deficient lineages and repeat the same negative karmic lessons, which only deepens the level of their mental insufficiencies and prevents them from grasping the UL.

However, the closer humanity moved to the current End Time and the final shift to 5D, the more profoundly these dark ones realized how immature and unrealistic their hope had been to ascend by desecrating human bodies through numerous abductions and insidious genetic experiments. Since we, the PAT, opened the stargate 11.11.11 and especially after the ascension of Gaia and the PAT to 5D at the portal 12.12.12 - 12.21.12 was a full success, the dark ones from the PTW knew definitely that they have no chance to ascend and became utterly desperate.

They never considered the basic gnostic Truth that Ascension is a divine dispensation of the Source and that only souls who have completed with their karma - that is to say, only old souls at the end of their long incarnation cycle in a human body - can qualify for ascension and begin with the individual LBP, which is closely coordinated by our soul monads and the Source. These evil dark ones have no chance with their deficient 4D technologies to do anything to save their perishing species, even though they can clone humans, however, with the tacit allowance of the human souls that decide to incarnate in such clones with a minimal soul essence as to humanize them.

No living being can exist in All-That-Is if it is not supported in one way or another by the life-spending force of the soul and the Source. This should be another basic gnostic knowledge and it is amazing that the dark evil ones decided to fully reject this obvious fact in their systemic madness, which is the utmost form of mental and emotional aberration from the Divine mind of All-That-Is.

And if you have carefully studied the human character on this planet, you must have encountered some very dark human entities who carry the exact same mental and emotional make-up as these dark evil ones from the former astral plane. I have met quite a few of them and as I have also fought numerous battles with these dark evil ones from the astral planes in numerous timelines in a conscious manner, before we could fully eliminate them and close the astral plane in 2016, I know exactly their dark, sticky, dis-

gusting, low vibrating energetic imprint and how unpleasant and abominable their energies feel upon contact. In case you have no experience with such energies, go to a scientific conference or a symposium and you will know it.

In 2017, I wrote my last book on the UL

[An Easy Propaedeutics Into the New Physical and Mathematical Science of the Universal Law – ebook](#)

in order to reactivate the codes of the new theory of the UL that was first written in the 90s, as the Elohim advised me. They also reassured me at that time that I would soon begin to create the new type of scientists who will easily understand and accept the new theory of the UL.

This is what we have been doing diligently since then. Everything that has happened since then, and there have some major energetic events that we have triggered or introduced by ourselves and about which one can read on this website and on [Carla's website](#), have contributed to the **creation of the new scientist of the UL.**

Essentially, these will be the new crystalline children who are now reaching the biological age to substitute the old caste of scientific drones and to eliminate them as a social phenomenon. These bright kids will quickly open to the full knowledge of their HS and I AM Presence and will very easily and with great grace begin to create the new reality on the 4D earth in the full knowledge and acceptance of the UL. We as ascended masters will support them from the HR and will guide them in the early phase when there will be a huge influx of new 5D technologies that will transform this planet into a **Garden of Eden.**

II. Enlightened Discussion of the PAT on the Falsification of Science and Religion

Wendy Xia, Patrick Amoroso and Georgi Stankov,
February 13, 2019

Read also: [The Greatest Conspiracy of the Dark Ones of All Times. Why Human “Fake Science” Is a Deliberate Total Deception](#)

Dear George,

[Excellent article today!](#) I can hear your big voice. Today's scientists are total victims of systematic mind-control under the guise of so-called science. The tricky part, "Team Dark" uses to fool humanity, is to mingle element of truth with lie to divert people's mind towards the external world rather than the inner world. That is where all empirical sciences come from. Scientists have to observe and prove an idea or theory by using external means, while it should be vice versa when human consciousness can be expressed as the **primary term**. Even today this is an established practice because when a fake idea, itself, is fake, such as those (mathematical scientific) models which can't be proven to be true and thus, self evidently fake, while when a principle is genuine, which means that it can be derived from UL, then of course it can be experimentally proven to be truth.

What I found during the translation of UL is that some important modern equations were obtained in a very limited manner under the condition of $f = 1$ (or $t = 1$). This of course can largely simplify the formula and expression (I couldn't find immediate example on top of my head, but you know what I mean). This also was my impression when I studied those equations in university, but forgot about it later on. Now I am being reminded of those derivative steps. It is very important since it proves that modern science is based on static when time is still or only in one timeline while in reality the world is in dynamic and the energy is constantly exchanging between the dimensions and objects. Therefore, it shows that modern science is trying to solve dynamic problems with a static tool without knowing that they have been fooled or unaware of from the beginning.

One of my colleagues who studied and used Scanning Electron Microscopy (SEM) for more than 20 years told me that the atom doesn't exist because when he looked at the supposed atom, he can see nothing. I assume he can't see energies. This proves that all is energy and there is no solid matter as we think of.

I am personally very empathetic towards all scientists around me. They are deeply buried into mud especially those who are high achievers. The current system takes its toll upon them. This is how "Team Dark" enslaves the otherwise bright minds of humanity. I happen to be the witness of it in both scientific and religious sectors. However, people are noticing the madness of the society, but there is no established external tools to equip them to re-think and use. In this situation, UL is emerging and it is arriving on the scene timely under divine's wing.

For now....

Enjoy the evening

With love and light

Wendy

Dear Wendy,

thank you so much for your excellent comments - you know the situation first hand and I have written this article actually for people who avoid science as they fear it, and essentially discuss the heinous tactics of "Team Dark" as you call it to derail true science, which is not known to most people.

You are absolutely right about setting $f = 1$ as this is how scientists eliminate dynamics in physics and built the empty static Euclidean space, in which they then describe movement and gravitation in classical mechanics. This mathematical trick is actually at the bottom of all human and scientific illusion that static space exists by eliminating absolute time $f = 1/t = 1$. I also speak of "arresting time in the head". With this trick they are able to measure space and time as distinct static entities, but this is another illusion as they have to arrest movement of energy that never ceases. In fact space and time are canonically conjugated as $c = \lambda f$, where lambda λ is the wavelength, and constantly change their values.

This is actually the key source of all illusion and agnosticism in science and daily life, as I have proved that [there are only two dimensions, space and time](#), and all that scientists do is to measure these two quantities by arresting frequency = absolute time = movement. This is the most insidious bug that has been inserted in human minds, but I think that this goes back to our souls as to create this 3D holographic experiment based on illusion and is not created by the dark ones. But they use it of course to deepen this illusion in science as they know where the bug lies.

We should probably make another discussion on this topic as it is central to understanding all scientific illusion.

And of course there is the stress due to senseless competition and the fear to fail in science which paralyzes the students already when they are young and they close their minds for the rest of their life. I will send you separately a letter from Patrick that tells a good story about this topic (see below).

I am glad that you liked this article as I wanted to write it long time ago but pushed it in front of me in the distant future as it is not a very jolly topic to discuss. But now the time was ripe for it to appear.

I wish you a peaceful Sunday evening.

With love and light

George

Dear George

Yes, "Team Dark" creates illusive science by arresting time or frequency to completely eliminate the dynamic nature of energy. No wonder physicists don't understand what energy is, while they supposedly deal with natural science of energy. I like equation $c=\lambda f$ and the beauty of the **rule of three** (the **Universal Equation**) can be seen from those expressions. What if physicists know f is a dimensionless number which belongs to the continuum of numbers and can be infinite, it will blow their minds away.

I like the word "arresting" you use. Actually, time has been hijacked in that sense and forced to become linear as human's faculty can only cope with

linear stuff by using linear languages etc.. However, linear time and space are also the product of karmic law which governs and determines everyone's 3D holographic life. Therefore, living in 3D world is an interesting life. Time is different for everyone. We have no time NOW because we have no karma as an old soul. The key source of time-space illusion affects every fields in human's life and they are all related. The senseless competition in every field is another trick to trap human to achieve false sense of success.

The illusive science has been created as an authority to strengthen the illusion in case religion failed to mire the minds of the people. So they have two sides to play with. I have been to local church today and felt extreme heart-broken for those who dedicated their whole life towards something non-existing.

It is time to change and that our education mission laying ahead is not trivial. The only solution is our ascension and there is no other options. People are still stubborn. Unless they see our manifestation as ascended masters with their physical eyes, they will not believe what we say now. We do need to talk about this subject in a way that non-scientific people can understand. I like your view on this in [your recent reply to Rob](#) a few days ago. For old soul, it is obvious and we already know it. But for adult and young soul, this is the tool for them to grasp and learn. I believe it will be swift when the time is ripe.

With love and light

Wendy

Dear Wendy,

it is mind-boggling to analyse on how many levels the dark ones have obfuscated science and religion, where empirical agnostic science also fulfilled the function of sanctioning religion not to become too spiritual and transcendental and eventually establish a true contact to the soul and the Source. What actually happened, is that with the beginning of modern time and the tacit acknowledgement of the Church that the Ptolemaic geocentric system to which it stuck for no obvious reason is wrong, Christianity gave up science completely.

Only yesterday Daniela told me that she checked on the Internet and found that the Vatican has reversed the numerous condemnations of Galilei some

20-30 years ago and has rehabilitated him at the time of the Polish papa Wojtila, but that it took them more than 25 years to renounce all pieces of condemnation. Can you imagine that in the current modern time?

Thus the clergy admitted long time ago that they do not understand science and since then have a huge complex of inferiority towards science as this could be seen clearly in the works of Ratzinger who had the ambition to deal with science, although he had no clue as I write sarcastically in my [essay on him](#). They know deep in their hearts that if they have to render a **Proof of God**, from now on it must be of scientific nature and they have no knowledge or faculty to do that. I have discussed this topic, dilemma of the Church, in my book "[Evolutionary Leap of Mankind](#)" in the introduction.

The current black Jesuit pope does not even care about science as he does not think at all - he is not an intellectual, he is actually a rat and a despicable political opportunist, very much like all secular politicians and he does not believe in God, very much like Ratzinger but for different reasons. Ratzinger was a young soul and had no connection to his soul, but this pope is a real dark archontic soul and a cynic. He does not believe in anything except power and manipulation as all Jesuits do.

I am not sure how many thinkers in the Church who study philosophy are really aware that a true religion and a true science must merge into a new form of scientific spirituality as I discuss this necessary future evolution of human spirit in my book "[The Cosmic Laws of Creation and Destruction](#)".

As it happened, I discussed exactly this topic with somebody I met here in Italy a few days ago, who is associated with the Vatican and then my HS urged me to extend this discussion to [Leonardo Boff](#) in Brazil, a famous South American theologian and a proponent of liberation theology, who was sanctioned by Ratzinger, first as the head of the Inquisition, and later on as a pope in a very cruel manner, so that he had to leave his church career and became a professor of theology. This was a big scandal 20-30 years ago but probably today only a few remember this story. He has not responded to my letter, but I know telepathically that he is in a total shock of what he learned from me and does not know what to do. He is after all 80 years old, but a good man, he thought his life has finished and now he sees that there is much more to come.

Strictly speaking, both science and religion are at the same precipice and look frightened and paralysed at it, even though they will never admit it. But the utter fear with which they respond to our efforts to open their minds is very instructive as Patrick made his experience with this new "female

Einstein", who to me looks very much like an hysteric, frigid woman. Obviously, science needs invalids (like the deceased Stephen Hawking) and wunderkinds to prop up its image by false compassion as they have no scientific arguments anymore to convince the masses. After all what has science actually brought to humanity in the last 100 years apart from the nuclear bomb and destruction? There is no truly revolutionary invention and we still use the old power engines from the 19th century to produce energy. This is ridiculous.

I think that I shall publish this discussion and will include also my correspondence with Patrick.

Thank you so much for this inspiration.

With love and light

George

Dear George,

The secrecy of Vatican will be disclosed in full one day and it will shock the whole world. Their bank and library hold accountability to humanity. I have been to the Sistine Chapel on Sept 11 in 2017 to view the Michelangelo's Creation. The whole hall was so dark and full of people. I did not feel very well when I was there. The priest in Brazil you have written to must have been feeling hope in his heart and he is blessed to have you contacting him. I read all your articles about Ratzinger who I was interested in as well as at the time when he was conclave as a new pope, there was so much rumors around him, given the fact that he was a German Pope. I later realized that you have very close connection to him by reading your articles.

The Vatican City, The City of London and Washington DC are the three cities of PTW which will be replaced by our magnificent three Cities of Light. Everything comes with three as English saying.

Science and religion go hand in hand and are the two sides of one coin as PTW designed it to be. They did everything they can to fool humanity and ensure there is no one to spot them. The moment is coming and the lies can no longer be hidden any more.

Enjoy the day.

With love and light

Wendy

A Magnum Opus

Dear Georgi,

Sir, you have outdone yourself in the consummate presentation posted today, "[The Greatest Conspiracy of the Dark Ones of All Times](#)". How any scientist with any moral rectitude still residing in their egocentric persona can argue with the merits of what you put forth would be a true exercise in futility.

I have posted the disquisition to both the PAT New Universal Law Page and the Public one on FaceBook with these brief comments:

"Where True Science and an Elevated Spirituality Transcend the Limitations of Human Consciousness Dr. Georgi Stankov reveals the full extent of the agnostic, spiritually-deficient and ultimate misleading betrayal of the scientific community in their egocentric quest to deceive the masses as Ascension draws near:"

<http://www.stankovuniversallaw.com/2019/02/the-greatest-conspiracy-of-the-dark-ones-of-all-times/#more-25463>

With love and light, Patrick

Dear Patrick,

Actually my goal was to show how the dark ones have manipulated science through form and direction of study, but first and foremost by atomisation of the unity consciousness of science by dividing it in numerous disciplines, and not to discuss why science is fake as this is what I have done in all my books and articles on science. I wanted to show how these dark ones have managed to mind-control the scientists out of the dark and why nobody has noticed that. I have always wanted to write on this subject but as it is rather distressing for me, I have pushed it to a future date. Now the time seems ripe to clear this topic.

Enjoy the day..

With love and light

George

Dear Georgi,

I recently came across an article concerning the emergence of what the scientific community has termed the " Next Einstein". She is a child prodigy of a certain intellectual aspiration. Her name is Sabrina Gonzalez Pastersky,

<https://www.instyle.com/celebrity/sabrina-pasterski-stephen-hawking-physics>

She graduated from MIT with high honors and is now at Harvard University pursuing a doctorate in theoretical physics at their department known as the Center for the Fundamental Laws of Nature.... Imagine that. A few days back I visited her FB page which is quite protected. In any event, I quoted as a post to the reference link "[An Easy Propaedeutics Into the New Physical and Mathematical Science of the Universal Law](#)". It stood publicized for an entire night's duration and then was removed from her site and I am now prohibited from accessing her page. All in all, I had a huge laugh, but my HS tells me that I kindled a fire. See also:

https://www.google.com/search?q=sabrina+pasterski&client=opera&hs=0Lt&source=lnms&tbn=vid&sa=X&ved=0ahUKEwjqlCrs7HgAhUo2FkKHWsaBrwQ_AUIDigB&biw=1493&bih=802

With love and light,

Patrick

PS: Her contact information is presented here:

<https://hetg.physics.harvard.edu/people/sabrina-pasterski>

She seems fully ensconced in the traditional realm of Fake Science..... But who knows? She was probably not one who was notified in our original 10,000 mailing list.

Dear Patrick,

this is an interesting curiosity and thank you for teasing the elephant in the room. The reaction was to be expected, but we are used to that. Science is so decrepit that they now need either invalids like Hawking, who generously relieved us from his presence in due time and now young wunderkinds to pretend to be of any relevance.

III. More on the Human Notion of Scarcity as a Scientific Fraud

www.stankovuniversallaw.com

First published on March 16, 2019

The Minotaur Labyrinth of Science in which modern man is trapped as the [Maze Runner](#)...

The intricate network of infinite lies and deceptions that build the current 3D matrix is virtually inextricable. However, if one follows the [Ariadne thread](#) of the new [Axiomatics of the Universal Law](#) (UL) and departs from the **Primary Term** of human consciousness, which is also the primary term of any, no matter how expanded, awareness in the multiverse, one can easily expose the basic lies in science from which all other human lies in this reality have evolved.

A thorough analysis of these basic lies from a scientific point of view is indispensable for a number of reasons. First, this topic has never been truly understood by all scientists and most other alternative critical thinkers who are in their vast majority not scientists and thus have no clue that this problem of great import even exists. Human cognizance ends up usually with the superficial interpretation of obvious facts as they are presented in a scattered fashion of deliberate obfuscations to the masses by the fake

MSM. In case there are more in-depth explorations as to the epistemological foundation of basic human terms and concepts, this has been reduced to meaningless pseudo-scientific peas counting void of any deep philosophical or transcendental understanding as one can witness in linguistics or in any other scientific discipline.

Interdisciplinary theoretical research is virtually non-existent in this 3rd millennium AD and what was left of it from the previous millennium has ceased to bother the drowsy minds of scientists and theoreticians. The fundamental and very important subject known as "**methodology of science**" is no longer taught at universities and one cannot find a single specialist who has the faculty to deal with this discipline both from a mathematical, natural scientific and philosophical point of view, while simultaneously including psychology, epistemology and linguistics, not to speak of other more mundane disciplines such as economics and finance. As methodology of science deals with scientific models of human thought from a logical and cognitive point of view, one must consider all sciences at once and in the current time of narrow specialisation such generalists no longer exist.

This website is the only forum worldwide that presents such a unique synthesis of theoretical analyses and disquisitions, including all Science and all Gnosis, and human life and I shall continue on this pathway till our personal ascension and transfiguration happens. After that this kind of discussion will only intensify as the people will, for the first time in their lives, grasp its importance for any true human evolution at the personal and collective level.

For that reason, I will highlight in this article some fundamental scientific, theoretical lies that have been deliberately inserted in the edifice of modern physics in order to reinforce the primordial idea of separation of the human incarnated personality from the soul and Source as the chief mechanism of enslavement and dumbing down humanity by the PTW (Power That Were) from the Orion /Reptilian empire. I have discussed this topic extensively in recent publications which should be re-read one more time in the light of the present disquisition as all my writings are axiomatically linked and present a very rich mosaic of human life.

Read:

- [**The Greatest Conspiracy of the Dark Ones of All Times**](#)
- [**Enlightened Discussion of the PAT on the Falsification of Science and Religion**](#)
- [**Humans Are Changing Rapidly to a New Energetic Species in Front of Our Eyes and Nobody Notices It**](#)

These disquisitions bear infinite possibilities of unlimited expansion of human awareness within the holistic world view of the new Axiomatics of the UL as it prepares the human mind for its merging with the I AM Presence and the unity field of All-That-Is. That in itself is already unique in the history of human ideas.

All other categorical and taxonomic systems of knowledge which humanity has developed in its short written and massively falsified history are essentially dead-ends. The only exception is ancient Gnosis as presented in Platonism and Neoplatonism, but these systems have no sound scientific background and cannot address the ubiquitous fraud in science and daily thinking with which mankind is confronted in the current End Time as to prevent the planetary ascension. Therefore, one cannot use the old Gnosis in order to resolve the problems and lies of modern science.

That is why I have proceeded in a two-pronged way in my scientific research by first developing a completely new theory of Science of the Universal Law that includes physics, mathematics, all bio-sciences and all social sciences (liberal arts). Parallel to that I have developed the new [Gnosis of the Universal Law](#) based on ancient Greek philosophy and Neoplatonism by rendering the missing modern scientific foundation of these otherwise correct transcendental teachings. In this way I have practically eliminated modern esotericism, in its worst and most debased form known as "New Age", as all these new esoteric teachings that aspire to substitute the old organized religions [are as void of any scientific basis as all religions are](#).

That is why all these aberrations of the human spirit will be eliminated once and for all on this planet when the Universal Law finds a full and global acceptance and comprehension by most humans. Actually these teachings were eliminated a quarter of a century ago when I discovered the UL in 1994. It is very important to stress this fact at this place, so that there are no misunderstandings and no ambiguities anymore.

Now let me concentrate on a topic which nobody has ever explored so far except for myself and even I have not dealt with it from a historical and gnostic perspective, but only strictly theoretically, within the accepted way of argumentation in present-day science as to avoid any criticism from a formalistic point of view and to address the narrow formatted minds of the scientists. While this approach is still the only appropriate way to reform human science from the bottom, it stops short of introducing the transcendental dimension which we shall firmly introduce on this planet with our ascension.

That is why I shall enrich my past discussion in physics with some novel gnostic insights in order to explain why the [wrong notion of scarcity in all human minds](#) leads to their full separation from the soul and source; and how the deliberate deprivation of their original creationary potential has been cemented by several fundamental concepts in modern physics that are blatant deceptions and obvious lies. Therefore, it is all the more surprising that nobody has so far discovered this scientific fraud and called it by name.

In my [previous article](#) I explained how the false physical dogma that photons have no mass has precluded the exploitation of [free photon energy](#) as unlimited source of energetic consumption and has decisively contributed to the current enslavement of humanity, mainly through leading perennial wars to control the scarce fossil resources such as oil and gas on the earth. Although these resources, as already pointed out, are not even fossil, but of anorganic carbon-based origin. This particular fact is though irrelevant for our theoretical discussion here as the only important psychological fact is that these energy resources are considered to be scarce and all nations need to fight for them in a bitter global geopolitical battle in order to survive, mostly from foreign aggression by the Empire of Evil (see Venezuela).

The concept of free photon energy was veiled with utmost brutality by the PTW in order to enslave humanity in the End Time and prevent its ascension as they themselves, being extremely dark entities, cannot ascend and need to go first through a very long and painful incarnation cycle of karma redemption before they can qualify for this divine dispensation in the far distant future. They have to begin, so to say, from the lowest rung of the evolution & ascension ladder in order to enter heaven some day. At the same time these heinous beings are so much enamored in their false god-like complex while being able to manipulate the incarnated human beings from the astral plane that they really believed that they are exceptional as also their political stooges in the Empire of Evil now claim with an increasing level of aggression and a vast spectrum of derangement syndromes, of which Russia and Trump are only tiny scratches on the surface of their deeply seated pathological insanity.

That is why they have introduced such an inextricable network of infinite lies and deceptions that have trapped humanity in a huge Minotaur labyrinth and in the centre of it is present-day science. This is the most insidious part of all human deception as science is considered to assess the truth about Nature (natural sciences) and us as biological beings (bio-sciences) and currently no person, who considers himself to be intelligent ever dares to challenge this claim. For the vast majority of humans nowadays science

is not a topic at all and they have such confused and distorted ideas about what science should be and how it should address Nature that their amateurish views are no better than their daily prejudices and judgments over which they constantly stumble and barely manage to arrange their private lives.

How it All Began

The era of massive scientific fraud began when the results of the [Michelson-Morley experiment](#) to prove the existence of **ether** were entirely falsely interpreted at the end of the 19th century. Essentially this interpretation led to the abolition of the ether as the initial term for **photon space-time**. Before this experiment all physicists believed, and rightly so, that ether was a form of matter only more ethereal and displays all the features observed in solid matter. For further in-depth discussion of this historical experiment and its consequences for the thorough obfuscation of physics as natural science read this article:

[The Concept of Relativity in Electromagnetism](#)

With the discovery of the Universal Law, I have proved beyond any doubt that the original and then rejected idea in physics that **ether = photon space-time** exists is absolutely true by showing how one can very easily calculate the *mass* of all elementary particles and molecules and thus the mass of any macroscopic material object from the mass of the **elementary action potential** of photon space-time.

[Read here: Mass, Matter and Photons – How to Calculate the Mass of Matter From the Mass of Photon Space-Time](#)

The wrong and deliberate abolition of ether and thus of photon-space time as the source of unlimited energy for humanity was the first major stroke of the PTW from the archontic Orion /Reptilian empire and their human stooges in science in order to derail physics as exact natural science and prevent any research in this direction.

It was followed by a series of further critical blunders that deepened this obfuscation in physics. For instance, the abolition of ether after the wrong interpretation of the results of the Michelson-Morley experiment gave birth shortly thereafter to the *special theory of relativity* presented first by Einstein in 1905 and later on to the *general theory of relativity* which remained incomplete to the present day and serves nobody. Also nobody seems to understand it as it is essentially wrong and makes no sense.

The special theory of relativity is actually Einstein's biggest plagiarism, of which there are many (he even stole some key ideas and results from his first Slavonic wife [Mileva Marić](#), who was an excellent physicist herself, and then abandoned her to marry a well-to-do Jewish woman when he became famous), as this concept was already developed by other physicists before him for electromagnetism. I have discussed this topic in great detail in my volumes on physics and in the [new Propaedeutics](#) and will only refer to these books at this place:

- [Vol I: Das Universalgesetz in Physik und Mathematik](#)
- [Vol II: The Universal Law in Physics and Cosmology \(Full version\)](#)
- [Vol II: The Universal Law in Physics and Cosmology \(Concise version\)](#)
- [Vol II: The Universal Law in Physics and Cosmology \(Full version, Bulgarian\)](#)

The actual theory of relativity is an application of **Lorentz transformations** of electromagnetism, with which the space-time of all material objects is mathematically assessed, while at the same time photon space-time is regarded as an empty, homogeneous entity. This mathematical presentation of space-time and its abstract quantities, such as *mass* and *momentum*, is called “relativistic“. Hence the terms: **relativistic energy**, **relativistic mass** and **relativistic momentum**. These quantities are built within mathematics according to the principle of circular argument by selecting "empty" photon space-time (the speed of light c) as the initial reference frame.

When I analysed the so called **FitzGerald length contraction** and **Lorentz time dilation** the way they are expressed mathematically within the theory of relativity, I immediately recognized that they are actually another tautological mathematical presentation (iteration) of the **Kolmogoroff's probability set (0,1)** in the theory of probability. I have though proved in the theory of the UL that this set is equivalent to the **continuum set** in mathematics. Hence we have a series of tautological presentations of the continuum set = **Primary Term** of the new Axiomatics of the UL disguised under distinct physical disciplines. This is how confusion arises in science and expands to fully mire the minds of all physicists and scientists.

And it gets ever worse. It was not enough for the PTW that with the abolition of photon space-time as real level of All-That-Is the exploitation of this form of ubiquitous energy was prevented for a very long time. From now on space-time (the space-time humans can perceive and assess is pho-

ton space-time) was considered to be entirely empty space where gravitation is propagated with the speed of light as "action at a distance", also defined as "long-range correlation".

It can't get more idiotic than that, one would think. Wait and see. In order to keep up pace with these major first blunders, subsequent scientists had to introduce new blunders in order to explain, rather excuse, their previous blunders. They decided to introduce the totally ridiculous and unverified dogma that photons have no mass (?). This happened to be easy as the very [definition of mass was a complete disaster](#) and the greatest blunder of science, together with the [wrong definition of electric charge](#).

Truly, I have tried to find any explanation in the literature how one had argued on behalf of this idiotic dogmatic conclusion and when this had happened exactly and have found none. Because there is none. The dogma that photons should have no mass is a complete and utter fraud. But this fully arbitrary decision has led to the total inability of scientists to integrate gravitation with the other three fundamental forces in the standard model as I argue in my [open letter to scientists](#) - a fact that even physicists must admit ([Wikipedia](#)):

*"The Standard Model of [particle physics](#) is the theory describing three of the four known [fundamental forces](#) (the [electromagnetic](#), [weak](#), and [strong](#) interactions, and **not including the [gravitational force](#)**) in the [universe](#), as well as classifying all known [elementary particles](#)."*

Then, when it was shown recently that *neutrinos* which are considered for the same obscure reason to have no mass as photons might actually have a mass, this almost derailed the world view of the entire scientific community and even that of the Reptilian Nobel Prize committee, which is not known to be very sensitive, as I have discussed in this article:

[How to Calculate the Mass of Neutrinos?](#)

I hope this gives you an idea how one blatantly false concept, or rather a lie, leads to another false idea or blunder and so on and on until you have the **Minotaur labyrinth of science**, where the Minotaur represents the Reptilian shape-shifters or the archons from the astral plane, the abominable dark entities, which we have fought for many years and defeated finally in 2016 as to secure the planetary ascension:

The Greek mythology holds the key to explanation of everything we experience nowadays - on this planet and throughout the dimensions as light warriors of the first and the last hour and incumbent Logos Gods of Gaia and humanity.

But the archons and dark aliens from the Orion / Reptilian empire could never be sure that all these lies and deliberate obfuscation in physics will be effective enough to prevent humans from realizing the infinite energetic potential of [free photon energy](#). They had the example with Tesla as a dreadful challenge to their heinous plan to enslave humanity and prevent its ascension in the current End Time by making it energetically vulnerable and dependent entirely on scarce fossil energy.

Tesla, guided by his I AM Presence, not only invented the first alternating electric current power aggregates as dynamos and electric motors and thus ushered the modern technological era of mankind at the turn of the 20th century by enabling broad electrification. He also showed that one can gain energy directly from photon space-time with his famous tower experiment. The PTW summoned quickly their human hangmen, the reptilians J.P. Morgan, J.D. Rockefeller and H. Ford who prevented Tesla from bestowing humanity with this unlimited free source of energy, and thus accelerating the ascension process, by financially ruining him and stealing all his patents. This is a well-known and very sad, and dark chapter of human history.

The PTW realized that they needed some more powerful scientific dogmas to offset the search for free photon energy by subsequent free spirited scientists and researchers whom they feared most as I can testify. After all, these sick dark ones knew that one only needs to depart from the **law of conservation of energy**, also known as the **first law of thermodynamics**,

to easily come to the idea to develop free photon energy as *perpetuum mobile*. For that reason they looked hastily for any possibility to offset this law, which was first formulated in a modern form by the German physician (medical doctor as the author) [Julius Robert von Mayer](#) in 1842. This man was immediately punished for this pivotal discovery by the PTW - he was declared insane by his peers, including the much acclaimed Helmholtz, and then tortured for many years in a kind of a medieval asylum as was usual at that time (19th century) in dark Germany.

For that reason the PTW needed to introduce a **second law of thermodynamics** that practically offset the law of conservation of energy which describes exactly and ubiquitously the closed character of All-That-Is = Energy and the availability of infinite Source energy to be used by humankind or any sentient being in the multiverse.

Indeed, in the late 30s of the 20th century they finally managed to commit this capital crime by introducing the **law of entropy** with the help of their Zionist stooge [von Neumann](#) who presented the modern mathematical version of entropy - the so called '[von Neumann entropy](#)'. This dark entity, considered to be a brilliant mathematician, also decisively contributed to the development of the first atomic bomb in the Manhattan project. One capital crime never comes alone.

The law of entropy practically rejects the law of conservation of energy as it postulates the [heat death of the universe](#) as an eschatological end of the world. This is an entirely archontic idea, believe me, as only derailed dark entities fully separated from the Source can develop such an insidious idea. Forget science for a moment and concentrate on the malignancy of these dark entities and their human marionettes in science and what monstrous ideas they have developed to dumb down humanity.

Essentially, what the second law of thermodynamics of entropy claims is that there is a constant irreversible dissipation of thermodynamic energy in the entire universe, as one observes in all adiabatic thermodynamic processes. By the way, even the "Big Bang" hypothesis of the adiabatically expanding hot universe goes back to the false notion of entropy and was developed around the same time.

For instance, when a metallic rod is heated at the one end the heat flows through the rod to the other cold end and it gets warmer until thermal equilibrium is reached. However, most of the heat energy is radiated in the air, in the atmosphere, or in the surroundings, such as adjacent material objects, and gets lost for practical purposes. For that reason all electric devices and also the entire electric grid have a low coefficient of efficacy as most of the electric energy is wasted as radiated heat.

The same holds true for human metabolism where about 60% of the energy gained from the food is given up to the surroundings as heat and cannot be used for the cell metabolism as I show in [Volume III](#), Part I, chapter 1.2, where I calculate the energetic balance of the human cells and the body and prove the validity of the UL for organic matter and the human organism. This calculation is based on the Universal equation as an application of the law of conservation of energy for the human metabolism as a particular energy exchange in All-That-Is.

By the way, the use of free photon energy will automatically resolve the problem of the dissipation of thermodynamic energy as it brings with it another basic energetic condition of the higher realms - **superconductivity**. Superconductivity is the dialectical aspect of free photon energy.

Magnetism, Polarity and Superconductivity as the Basis of Creation – Message 6

Superconductivity of Mind Leads to Superconductivity of Matter and Photon Space-Time

Please observe that all the aforementioned examples of dissipation of thermodynamic energy (heat) are only one-sided perception of energy exchange and do not consider what happens with the thermodynamic energy that is released to the surroundings and only seems to be unavailable for further use by humans. The dissipation of thermodynamic energy as postulated in the law of entropy is probably the biggest fraud in human science as it was introduced deliberately in order to prevent the development of new advanced technologies based on free photon energy after Tesla succeeded to achieve precisely that in the early 20th century.

I have debunked the second law of entropy in the new theory of the UL and eradicated it from science for ever.

Read: Volume II, chapter 5,6. Entropy and the second law of thermodynamics (ND) p. 208

I have shown that this law builds an **antinomy** - a fundamental paradox - with the law of conservation of energy and is the most unscientific fraudulent idea ever introduced in science. It is no coincidence that it has been reported that von Neumann had advised all his students after WW2 to write a doctor thesis on entropy as nobody understood what it meant and they would have an easy job graduating, which they surely did as they had their evil master, von Neumann as a protector. This is how the zionist dark entities operate on a human level in order to dumb down humanity in the most obnoxious manner.

And now comes the final highlight of this discussion. It is quite easy to prove that the law of entropy contradicts the law of conservation of energy, which is directly derived from the primary axiom of the new Axiomatics of the UL and why it should be eradicated from science as the greatest blunder.

But it is not that easy to prove scientifically that every thermodynamic gradient that we observe in matter until it dissipates **creates an equal in magnitude thermodynamic gradient at the level of photon space-time (electromagnetic spectrum)**. If such a law can be mathematically derived, then this is the ultimate proof that free photon energy is very easily available to mankind and can be immediately used to create infinite abundance on this

planet. This new law will be a derivation or a special application of the Universal Law for photon space-time and it can be very easily experimentally proven as it will contain physical quantities and fundamental constants whose values are known in physics and can be experimentally measured.

In this way one can easily measure every thermodynamic gradient in photon space-time that is built when an equivalent thermodynamic gradient dissipates in physical matter and creates the illusion of entropy or heat death of the universe. It is cogent that what one can measure in science, can also be very easily reproduced and harnessed for further practical use by humans.

However, no scientist has ever tried that before as all scientists believe in the idiotic concept of entropy and have no clue that thermodynamic gradients also exist in photon space-time.

Further reason for their ignorance is that they firmly believe in the absolutely fake scientific dogma that photons have no mass and that photon space-time is empty. For this same reason they cannot integrate gravitation with the other three fundamental forces in the standard model. With that the vicious circle of total scientific derangement syndrome closes. Not yet..., it is much more convoluted.

Please observe that we, humans, can only observe, perceive and assess physical matter and photon space-time and that our physical world view is built entirely on the energy exchange between these two energetic levels of All-That-Is. Even our physical bodies are the result of this energy exchange as I prove in [volume III](#) on the General Theory of Biological Regulation. This is a basic conclusion of the new theory of the UL.

Unfortunately, scientists do not know what energy is as the great physicist Richard Feynman frankly admits in his Lectures on Physics, although physics is a science of energy interactions. Furthermore, they do not even have the faintest idea that with their limited senses and linearly operating mind **humans can perceive energy only as space-time**.

This is the most profound illusion which is, however, created this time by our souls and not by the evil PTW in order to have the illusion of the current 3D incarnation experiment. Otherwise this experiment cannot be set in place if human awareness is as expanded as in 5D and higher dimensions. Therefore, this expanded awareness is attached to the carbon-based physical brain and operates as limited human ego-mind due to the very slow propagation of neuronal signals in the synaptic junctions.

What scientists should have easily discovered, but have utterly failed to understand, is that **space-time has only two dimensions (constituents)** - *space and time* - as the term says it, and not six or seven fundamental dimensions as they claim with respect to the SI system.

[Read: Why Space-Time = Energy Has Only Two Dimensions \(Constituents\) – Space and Time \(Part 1\); Essay: Systems of Measurements and Units in Physics](#)

In addition, they should have known - that is why they developed the theory of relativity - that the space-time they describe is not empty as they believe but full of energy. The reason for this fundamental cognitive blunder is that they did not revise the empty Euclidean space of classical mechanics where all macroscopic gravitational interactions are observed and only added to it a fourth dimension of time in the still empty Minkowski space in the theory of relativity as Otfried writes in his latest article "[Realitas infinita – Unlimited reality](#)".

Therefore, scientists can only observe any energy interaction if they artificially, apriori eliminate energy exchange as movement by [arresting absolute time \$f\$ \(frequency\) in their heads](#). In this way they transform space-time, whose two dimensions are canonically conjugated and in a constant state of expansion and contraction so that they change their magnitudes all the time, into static empty space where they can comfortably make their experimental measurements with the SI system. This is the greatest illusion of all and it is a product of the agnostic minds of the scientists that has to be resolved from within - through spiritual evolution of awareness. It is not a matter of futile experimental empiric research as it is done nowadays with zero practical effect.

And to top it all, this illusion of static empty space in science has been cemented by the use of *closed rational numbers* in mathematics and from there in physics and other exact natural sciences. This leads to a deterministic approach in science. In reality, energy = space-time can only be described by **open transcendental numbers**. However, humanity has not yet been able to develop mathematics based on open transcendental numbers that allows for infinite solutions, which is the true nature of All-That-Is.

But the biggest gnostic blunder of all is that scientists do not understand that *energy = space-time = external physical world = Primary Term of human consciousness* is not inanimate physical matter, but **conscious energy**. Therefore, there can be no separation between human consciousness and

the external physical world as **conscious energy is All-That-Is**. And finally, scientists need to understand that this 3D reality is the creation of our souls just as we human beings are creations of our souls and the Source.

Brethren, this is really a dystopian world of infinite illusions and deceptions and modern man is the proverbial [maze runner](#) trying desperately to put the pieces together to find out the ultimate truth and thus the way out of this nightmare. This is what this article is all about.

Let us now turn back to physics one more time and eliminate the final dark vestiges of this fake Orion science. After much trial and error, I could derive a new law in 1996 that **proves the existence of [free photon energy](#)** everywhere and called it:

Stankov's law of photon thermodynamics

Read: [Volume II](#), Chapter 5,7, page 217

I will refrain from deriving this law mathematically in this article as this is not necessary and because this article is dedicated to non-scientists to whom I want to convey the systematic effort of the PTW to falsify physics and science with the only sinister objective in mind:

To prevent humanity from grasping the truth that they have unlimited access to Source energy, and by default to free photon energy, and that they themselves are sparks of God and thus very powerful creator beings who can harness and use these energies the moment they open their minds to this idea - to the idea that they are immortal souls, powerful multidimensional creator beings, who have only incarnated in a physical human body as to experience the opposite of this condition. That is to say, to experience the illusory separation from the Source and the alleged loss of creative power as an incarnated human personality in order to learn to appreciate the true nature of who we truly are - immortal powerful creator beings who have created this illusion for ourselves as to prove to ourselves that we are capable of overcoming it and ascend. Now!
